The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 5 are rejected under U.S.C. 102(e) as being anticipated by Hirokane et al (US 5,428,585).

Hirokane et al disclose a magneto-optical recording medium which comprises a first magnetic layer wherein in-plane magnetization at room temperature range changes to perpendicular magnetization and change to an in-plane magnetization at higher temperature ranges; a second and a third magnetic layers having perpendicular magnetization.
